

# PRODUCT CHANGE NOTICE

Multitel is pleased to announce the release of the new version of **FIRMSuite 5.01**.  
Get up to speed by upgrading your software to get Capacity Management freshly redesigned.

THE PRESENT FEATURE-SET IS SUBJECT TO CHANGE WITHOUT NOTICE

## NEW FEATURES

### Understand instantly power capacity levels

Reproduce your power equipment grid to gain critical visibility over your load distribution and understand rapidly utilization levels of your equipment. Get access in one-click to essential information to help you take critical decisions for business continuity.

### Data collection and validation process optimized

Manage data entry and approval by equipment type while mitigating human mistakes and inconsistency using standardized data forms. Access quickly historical data charts and tables for reference purposes while entering and approving data.

### Create synergy between AC and DC power teams

It is no longer necessary to navigate between two tabs to understand the state of your power infrastructure – the all-new Capacity Management allows you to consolidate your AC and DC equipment in a single web page, allowing your AC and DC groups to work in harmony.

## MAJOR ENHANCEMENTS

### Asset Management

1. **(SKY-769)** - Readjustment of the conductance reference field units and impedance reference for the cell models.

### Synchronization with FIRMSuite legacy

1. **(SKY-524)** - Synchronization of new fields for models already imported in SKYNET.
2. **(SKY-525)** - Synchronization of new fields for equipment already imported in SKYNET.
3. **(SKY-532)** - Synchronization of models and cell equipment type already imported in SKYNET.
4. **(SKY-688)** - Synchronization of approved manual entries of SKYNET to FIRMSuite legacy.

### Data Gathering Management

1. **(SKY-488)** - Modification of audit scoring rules to be able to configure all possible results.
2. **(SKY-794)** - Modification of audit templates:
  - To allow the possibility to generate reports according to a period
  - To improve the recurrence of a period
  - To visualize in read-only previous versions of an audit template.

## MINOR ENHANCEMENTS

### Dashboard

1. **(SKY-518)** - When dashboard's map does not display, a list of sites is now displayed.
2. **(SKY-528)** - With Firefox browser, the right section containing sites' listing was not displaying in the dashboard.

### Security

1. **(SKY-726, SKY-462, SKY-463)** - Modules access menus are now displayed according to users rights.

### Asset Management

1. **(SKY-732)** - Faster saving process after a modification of a rack model.
2. **(SKY-768)** - Drop-down or multiple-choice fields have no value displayed if a site, a model or a device are edited in read-only with no selected option.
3. **(SKY-781)** - Standardization of displayed field values of a site, a model or an equipment in read-only.
4. **(SKY-797)** - The red star is no longer displayed next to required fields when fields' values of a site, an equipment or a model are displayed in read-only. The label of a field is also no longer displayed in red if there is no value.
5. **(SKY-846, SKU-857)** - Readjustment of maximum value allowed for field "Maximum Current Allowance" at 1 000 000 when the field is edited.

### Data Gathering Management

1. **(SKY-770, SKY-787)** - Allow to visualize in read-only oldest versions of audit templates.

## Rack Management

1. **(SKY-380, SKY-723)** - Allow to delete equipment from a rack.
2. **(SKY-522)** - Creation of a specific view of a rack model.
3. **(SKY-808)** - No page reload needed to make visible an additional rack.

## BUG FIXES

### Asset Management

1. **(SKY-854)** - "Positions Provided" field value of a rack model can no longer be in decimal.
2. **(SKY-855)** - "Required Positions", "Required Positions Above" and "Required Positions Below" fields values of a rack-mountable equipment model can no longer be in decimal.

### Data Gathering Management

1. **(SKY-486)** - When a category is renamed, the change is now reflected at workflow and audit levels.

### Battery Maintenance

1. **(FIRM-1127)** - Now using cell reference value to calculate the SOH instead of cell model value.

## Rack Management

1. **(SKY-459)** - When editing a "controller" or "drain equipment" equipment type model, if the value of the "Current Consumption" field was modified, racks' statistics containing those equipment models were not recalculated.
2. **(SKY-460)** - After deleting and adding an equipment in a rack, the rack icon in the site inventory was not updating itself.
3. **(SKY-461)** - When editing a rack-mountable equipment model, if the value of the "Required Positions Above" or "Required Positions Below" field was modified, racks' statistics containing those equipment models were not recalculated.
4. **(SKY-847)** - When a rack-mounted equipment was requiring mandatory positions below or above, the exclamation mark was no longer displayed.
5. **(SKY-851)** - Moving an equipment from the inventory to a rack no longer makes it disappear from the user interface.
