| ATL-3833 | Sub-Activity Updates After Asset Creation.
Sub-activities are updated when related assets are created from the Network View. |

- ATL-3874** **Individual Image Removal from File Uploads.**
A single uploaded picture can now be deleted without removing the other images.
- ATL-3845** **Mandatory Question Indicators.**
All Activity questions tagged Mandatory now display a red asterisk.
- ATL-3872** **HEIC File Support.**
Added support for HEIC files in Atlas.

5. BUG CORRECTIONS

- ATL-3881** **Comma-Delimited Data Import Files**
Fixed an issue where the Data Importer could not process files using commas as separators.
- **Duplicate Activity Pop-Ups**
Removed a duplicate pop-up appearing in Activities.
- ATL-3839** **Mandatory File Upload in Activities.**
Resolved an issue preventing an Activity from being completed when a mandatory FileUpload field was used.
- ATL-3819** **Asset Event Log Count.**
Fixed a mismatch between the number of reported events and the events displayed in the Asset Event Log.
- ATL-3825** **Notification Configuration Form.**
Corrected an issue affecting the Notification Configuration form.
- ATL-3831** **Clear Action for Date-Time Questions.**
Fixed the Clear action in the calendar control for Activity DateTime questions.
- ATL-3854** **Activity Template Duplication.**
Fixed an issue where duplicating an Activity Template did not duplicate its questions.
- ATL-3885** **Search in Activity Views.**
Corrected the initial display of Activity Views so Search criteria are applied.
- ATL-3840** **Calendar Display in RevoGrid.**
Resolved a visual issue affecting the calendar control displayed inside RevoGrid.
